Training and competency requirements

This application should be read in conjunction with [Categories for Accredited Contractors List for Land Development](#) and [Training and Competency Requirements](#). SA Water will consider a temporary authorisation to permit the contractor to upskill or gain experience in areas outside of current accreditation category. Applications for temporary authorisation are evaluated on a case by case basis, providing a risk based approach is undertaken to mitigate and manage all training, competency and experience gaps of the contractor.

Works category details

Please complete the following and nominate what category requirement is requested for temporary authorisation. Respondent must detail the scope of the works, the construction methodology and the mitigation measures put in place for SA Water's evaluation. Mitigation measures must address all training and competency requirement gaps of the accredited contractor.

| Category requirements <i><Tick all that apply></i> | Temporary authorisation requested for qualification and/or accreditation area | Temporary authorisation requested for experience within previous 3 years |
|---|---|--|
| PVC / PE water supply pipelaying < 375mm | | |
| PVC / PE gravity and pressure sewer pipelaying < 300mm | | |
| Pumping station, tanks and other infrastructure – Construction and installation | | |
| DICL pipelaying > 375mm | | |
| DICL pipelaying < 375mm | | |
| MSCL pipelaying > 375mm | | |
| MSCL pipelaying < 375mm | | |
| PE pipelaying - welding / fusion | | |

| Qualification / accreditation area / experience |

| Mitigation measures |
| <Detail Mitigation Measures that address the contractors Training, Qualification, Experience Gaps and explain how any Non-Conformances will be managed?> |
| Supporting information |
| <Example - Drawings, ITP's, Previous Experience> |
| Conditions of acceptance |
| <p>This temporary authorisation is subject to the following conditions and expectations:</p> <ol style="list-style-type: none"> I. The temporary authorisation applies only to the nominated Accredited Contractor for Land Development (contractor) and applies only for the duration of, and specific to, the build requirements for the nominated project, development and stage. II. The successful temporary authorisation and all specified conditions will be formally included in the DAFI and will form a part of the agreement between SA Water and the developer. III. The developer and contractor will ensure compliance with all specified conditions and requirements of the temporary authorisation for the duration of the project. |
